FEATURE-BENEFIT PRESENTATION

TSPLITS™

from Vision to Implementation…!

TSPLITS™ = Talisman Simple Project Lead & Input Tracking System

Why **Talisman** – we strive to be your good-luck charms.
Why **SPLITS** – we share.

The Basics

Most plans don’t fail because the idea is wrong. They stall because projects are structured the wrong way for the people to whom they would most likely appeal.

Hence, our “Talismen” help you match your vision to the structure that fits best, then hand off to the Marketing Team, which promotes your project to the greatest number of people possible, globally.

Webster M., Chief Projects Analyst:

Welcome…

“We spend our days working with people who have a vision, but are unsure of how to turn it from idea to plan to initiation and success.

We love such challenges. While we cannot say we are successful 100% of the time, we can increase your probability of success, and our services are free with your active TSPLITS™ account.

Give us a try…!”

Four ways to plan for success

Structure	In plain words	When it fits
Conventional	Basically, payment in full, cash or financing. Title and usage rights change hands at closing.	– For buyers ready to commit to objects, projects & opportunities.
Lease-to-Own (LTO)	Buyers put money down and pay the balance in instalments. Requires lease-to-own agreements drawn up by lawyers to define usage rights before title changes hands upon payment in full.	– Best for buyers who would rather not go through banks. – Best for sellers who would rather disguise selling prices.
Fractionalization	A single entity divided into legal units, each with its own usage rights and share of the upside.	– Best for investors whose goal is, e.g., condofication.
Tokenization	An ownership interest, whole or fractional, recorded as a transferable digital asset.	– Best for raising capital while keeping stakes clear & auditable.

1. How we work together

1. **You share your vision:** tell us about the opportunities you see for each qualifying listing, and what you or your clients might like to achieve there (a ‘back of a napkin’ rough outline is fine).
2. **We suggest the best structure** for your goal, and then scale it for the long term by applying conventional, lease-to-own, fractionalized or tokenized transaction options. There is no obligation, ever.
3. **You go to market and decide** whether working with us is right for you. If it is, you register a TSPLITS™ account and a PIN (Point Of Interest Node). The account and your PIN(s) are not free, but our service is.
4. **You deliver** for your clients above and beyond. Who among your competitors can point to this level of competence, choice and service…?

2. Levels of Participation

There are 45 markets in the USA and Canada, each supporting five levels of participation:

1. Market Partners: a corporate equivalent, top of the TSPLITS™ pyramid, but localized.
2. Root Account Partners: typically brokers or team leaders – corporate ‘Market Starter’ Root Mapsites are assigned to them.

3. Derivative Account Partners: typically Real Estate Professionals working for brokers or team leaders – they populate Root Mapsites.
4. For Sale By Owner Sellers (FSBO): typically, they wish to advertise anonymously, which cannot be done on typical industry platforms.
5. Adpro Account Partners: typically, they are Referral Partners or Co-Promoters building their own platforms for exposure or profit.

3. Market Partners – what you get

You are assigned one semi-exclusive TSPLITS™ market. Semi-exclusive means there is no direct competition, but neighbouring markets may place PINs – Point Of Interest Nodes – that represent objects, projects or opportunities they legally have under contract from time to time.

1. **Feature:** you build your own semi-exclusive market and work it under SPLITS30 terms.
2. **Benefit:** we provide the technology, including shopping carts, administration, Mapsites and eBook generators and – optionally, once you have reached a certain size – in-house online TV.

4. Root Accounts – what you get

You operate your own Mapsite within a TSPLITS™ market.

1. **Feature:** Mapsites are map-based websites maintained by Derivative Account Partners and licensed by you under SPLITS30 terms. Your Mapsites show all PINs placed, and you charge for monthly access and per PIN.
2. **Benefit:** SPLITS30 terms mean you charge for annual and monthly registration, plus weekly for PIN placement, to ensure that listings get removed quickly when no longer active.

5. Derivative Accounts – what you get

Each Derivative Account Partner may place and promote up to 100 PINs on the Root Account Mapsites to which they are licensed.

1. **Feature:** Mapsite PINs are infinitely less expensive than outside advertising, yet they can become online destinations.

Functionally, PINs open in flags with links to two URL redirections, a dedicated eBook and an optional in-house online TalisTV™ channel.

2. *Benefit #1:* TSPLITS™ syndication distributes PINs to an ever-increasing directory of classifieds sites that can contribute actionable buyer and seller leads NOT originating from industry platforms.
3. *Benefit #2:* TSPLITS™ syndication can make non-licensed administrative positions revenue-producing by "selling" PIN placement to Referral Partners and Co-Promoters as part of weekly tasks.
4. *Benefit #3:* TSPLITS™ syndication can apply upward pressure on reward metrics over time by establishing service floors. The implicit message we introduce for you: '…stay above an arbitrary value for fees and term to be in…! Stay below it and miss out…!'

Aisha C., Marketing Team Manager:

Brokers & Team Leaders…

"We are determined to prove that point 5.4 will pay for your TSPLITS™ account many times over, annually.

It can move you up-market, consistently keep you top-of-mind and generate word-of-mouth – the least expensive and most effective form of advertising – at rates not previously experienced.

Let us prove it to you…!"

Ancillary Benefits for Real Estate

Many of the best listings – Multifamily Housing, Tourism & Hospitality Objects, Office or Retail Centres, Residential, Recreational or Commercial Developments, Government Land and Surplus Buildings – are not given freely; they must be earned in ways that cannot easily be accomplished based upon industry platforms and standard differentiation techniques.

For example, some buyers and sellers may want to be extra visible. Others want to avoid identification at all costs. How do you manage to satisfy both, given that industry platforms standardize requirements that will not provide enough visibility for some, and way too much for others?

You use Mapsites

1. By default, Root Account Partners get one Mapsite and one Home PIN with their account.
2. Derivative Account Partners are licensed by Root Account Partners to publish to their account.
3. Both Root and Derivative Account Partners can add Private and Adpro PINs:
    a. “Live”, for those who choose high degrees of visibility;
    b. “Blind”, for those who choose near-complete anonymity.

    Yet both get the same level of exposure, simply by appearing on this industry-adjacent platform that drives traffic based upon four links per PIN: URL 1 and 2, TEB (eBook) and TTV (in-house online television – optional).
4. Mapsites can be set up for advance payments, bartering, swaps and any other compensation method cleared by the Root Account Partner.
5. Finally, Mapsites are the quintessential Relationship Marketing tool: would it be worth the weekly cost of a PIN to broadcast, e.g., grandma’s 100th birthday, a graduation or junior’s soccer final for family and friends? Of course it would – a dollar a day, and you receive all of those new contacts who will have agreed to receive communication from you. The term ‘…water cooler talk…’ will take on a completely new meaning.

6. Private and Adpro Accounts – what you get

Single PINs on dedicated Mapsites.

1. **Feature:** a dedicated PIN that can act as a gateway to whatever you choose it to become once moved beyond the Mapsite.*
2. **Benefit:** your PIN becomes the centre of your own virtual market – no distractions or sidetracks.

* Contents must be non-political and in good taste by generally accepted standards, at our sole discretion. We reserve the right to switch any PIN to blind at any time, without warning and without incurring liability for a refund, until it is back in compliance.

7. A typical Account Adoption Process for Real Estate

We call it the ‘Core Business Analysis’ approach.

1. A Broker or Team Leader looks at all of the Brokerage or Team listings. Is there at least one that might benefit from value added? If yes…
2. Is it worth incurring the expense of a TSPLITS™ account?
    1. Brokerage / Team annual: **CA$1,000.00**
    2. Brokerage / Team monthly: **CA$100.00**
    3. Agent annual: **CA$200**
    4. Agent monthly: **CA$100.00**
    5. Each listing PIN: **CA$7 weekly** (a dollar a day).
3. How many agents are there in the brokerage?
4. How many will participate – and – do you want all of them to participate, or would you prefer to establish a merit system, where only the top agents get to participate?
5. How many PINs will they each place (remember, each Mapsite has a limit of 100 PINs per agent)?
6. Can expenses be mitigated by…
    a. Listings won? – Probably; no competitor has an industry-adjacent Mapsite.
    b. Transactions closed? – Probably; more immersive presentations often lead to better sales, quicker.
    c. Higher fees and/or longer listing terms? – Of course; service floors basically guarantee that.
    d. Longer-term renewal rates? – Of course; no competitor can match what you can do for them.

Service floor calculation:

7. We offer SPLITS30 – 30% of whatever comes in from monthly and weekly revenues is shared with Brokerages and Teams (Root Account Partners).
8. Annual fees pay for technology and support, and thus will not be shared.
9. We pay Market Partners.

Payouts are made on the 1st of every month, two months deferred, to allow chargebacks, etc., to clear.

8. Value Added

Differentiation Tools (in order of application)

1. **Mapsite:** The moment you build your first eBook – or one is built for you because our Marketing Team thought one of your listings should have one – you receive a Mapsite website and a temporary FAST Code (Free Allocation – Standard Tracking). The Mapsite and FAST Code are generated when a sample eBook is built using the 'Centrefold' template.
2. **Talis eBook (TEB):** We provide three eBook templates – MS Word, Apple Pages and Google Docs – which you can download and use: simply replace the sample images and publish to PDF to turn brochures, project outlines and fact sheets into page-turning eBooks on your own online bookshelf, from where they can be shared.
3. **Talis Value Added (TVA):** This is what Webster and his team do. They analyze your listings to establish whether, in their opinion, there is a "there" there and, if so, summarize it in a message to you. If you would like to pursue it further on your client's behalf – GREAT, this is the beginning of a fulfilment process. If NOT, you will never hear another word about it.
4. **Talis Television (TTV):** An optional extra – we act as your production team, turning your photos, audio and video footage into virtual open houses, virtual walk-throughs and infomercials, with or without hosts or co-hosts. This puts the brokerage / team's external communication on another level: you can literally schedule when your local audience will pay attention to you and your agents, and by expanding your programming beyond just real estate, you have just obtained THE quintessential relationship marketing tool.
5. **Geographic, demographic and psychographic marketing:**
    a. *Geographic:* you are licensed wherever you are licensed, but you vacation in _____, or you plan to move to _____ soon. You already know your way around there, and you have a surrogate there with whom you might work. So – why not do Mapsite deals there?
    b. *Demographic:* you live wherever you live, and your office is located wherever it is located, but you know about the _____ industry, and that market is somewhere else locally. So – why not place your Home PIN in that area and become more visible to that type of clientele?

c. *Psychographic:* you succeed at real estate, but it does not define you. In your heart you are _____, and you have the most fun working with prospects who share that passion. So – why not place your Home PIN in that area and become more visible to that kind of clientele?

9. Frequently Asked Questions

1. **Do Mapsites replace MLS® or traditional listing sites?** No. However, they can work alongside them to reach people who are otherwise often missed.
2. **Is TSPLITS™ a real estate brokerage?** No. It is an advertising, marketing and project development entity. Your real estate transactions are handled by professionals you choose.
3. **Do you charge referral fees?** No. We charge to maintain accounts.
4. **Is there a long-term commitment?** No. Simply let your account lapse.
5. **Can you promise me a sale?** No. Nobody honestly can. What we promise is a professional map-based web presence and a team that helps you shape an opportunity more likely to succeed given specific circumstances.

10. Legend

Mapsite: a map-based, real estate industry-adjacent marketing platform provided by TSPLITS Inc. of Nova Scotia, Canada.

PIN: Point Of Interest Node: a marker on a map that opens an image, write-up and links when clicked.

TEB: Talis eBook: page-turning eBooks made from your PDFs. ‘Centrefold’ and ‘Facing Pages’ generic samples are provided as MS Word, Apple Pages and Google Docs originals.

TVA: Talis Value Added: listing analysis and review of possible alternate deal structures or investor classes to suit an object, project or opportunity (if any).

TTV: TalisTV™: audio and video production and online broadcasting. This optional extra will be made available in late 2026 or early 2027.

MLS®: Multiple Listing Service® and MLS® are trademarks owned by The Canadian Real Estate Association (CREA) and identify the quality of services provided by real estate professionals who are members of CREA.
