Tsplits™

from Vision to Implementation…!

Tsplits™ = Talisman Simple Project Lead & Income Tracking System

Why '**Talisman' - w**e strive to be your good luck charms.
Why '**splits' -** we revenue share.

1. The Basics

Most plans don't fail because the idea is wrong. They stall because projects are structured wrong for people who most likely would support them otherwise.

Hence, our "Talismen" and "Taliswomen" help you match your vision to the structure that best fits before handing off to Marketing, who promote projects to corresponding target audiences, globally.

2. How we work together

1. **You share your vision…**
   Tell us about the opportunities you see for each qualifying listing, or opportunity(1), and how would you bring it about? Please note: a 'back of a napkin' rough outline is fine.
2. **Then, we analyze your approach…**
   If applicable, we suggest a structure and terms to achieve your goal. If you agree, we scale it for the medium or long term. Of course, you are never under any obligation to adopt our suggestions.
3. **However, if you decide…**
   That working with us is right for you, then register your account and claim your market by placing your Home PIN(2). The account and subsequent PINs are not free, but our services are upon registering your account and market.

(1) Qualifying listings meet or exceed your service floor (more about that later).
(2) Home PIN based Markets typically include 50 miles (USA), or 80 kilometres (Canada), around a population centre that contains around 100,000 people.

Introducing: **Webster M.** - Fulfilment Manager

Welcome…

"My team and I *spend our days working with professionals who have a vision for a listing, but are unsure of how to present it to prospects, viably. We love such challenges.*

While we cannot say we are successful 100% of the time, we can help improve your adoption rates. Best of all, our services are free with your paid Tsplits™ account.

Give us a try…!"

3. There are four ways we structure for success:

1. **Conventional deals:** payment in full, cash or finance (we may be able to help with that), title and usage rights change hands at closing.
   — Best for buyers and sellers ready to commit to objects, projects and other forms of opportunity.

2. **Lease-To-Own:** Buyers put money down and pay the balance in instalments. Requires lease-to-own agreements drawn up by lawyers to define usage rights prior to title changing hands upon payment in full.
   — Best to set up buyers, who would rather not go through banks.
   — Also good for sellers, who wish to disguise selling prices.

3. **Fractionalization:** A single entity divided into clearly defined legal units, each with its own usage rights and share of an upside.
   — Best for investors, whose goal is fractional ownership of underlying assets.

4. **Tokenization:** Based upon shared ownership interests, in whole or fractional, recorded as transferable digital assets in an LLC.
   — Best for raising capital while keeping underlying assets unencumbered.

4. Tsplits™ Markets in North America

There are 45 Tsplits™ regions in the USA and Canada, each containing (up to) four additional participation levels:

1. Level 1 = as Market Partners you are assigned one semi-exclusive Tsplits™ market[3], where you build your own virtual network and apply SPLITS terms.[4] We provide the technology, including CRMs, shopping carts, eBook generators and - subject to size restrictions - in-house online TV.
2. Level 2 = unlimited Root Account Partners, who register 50 miles (USA), or 80km (Canada), around their Home PIN. Typically they are brokers or team leaders, whose "Root Mapsites" empower Derivative Account Partners to be more in control of their external communications.
3. Level 3 = unlimited Derivative Account Partners, who place PINs on "Root Mapsites". Typically they are Real Estate Professionals, whose business model is listing and selling real estate, but the principle applies to any major purchase industry (price $10,000+; product is immobile, rolls, floats or flies).

Additional Participation Classes

4. For-Sale-By-Owner sellers (FSBO) generally wish to save on real estate fees, or sell anonymously. Those two objectives are generally incompatible with industry platforms, hence they choose one PIN dedicated "Root Mapsites" to place PINs. This makes them prospects for Root Account Partners.
5. Adpro Account Partners (Adpro) build presences for exposure or profit. They, too, advertise via one PIN "Root Mapsites", which makes them prospects as Referral Partners or Co-Promoters for Root Account Partners.[5]

[3] Semi-exclusive means there is no direct competition, but neighbouring markets may from time to time place PINs that identify objects, projects or opportunities their neighbours may have under contract, legally.

[4] SPLITS means revenues are split between Corporate, Market Partners and Root Account Partners. Amounts are negotiable, but Corporate always receives a 40% minimum percentage of MSRP - per month, and per PIN.

[5] This user group becomes especially important, when TTV is integrated, as it is most likely to make "Root Mapsites" online destinations that can command attention based upon schedules and features.

Introducing: **Alisha C.** - Advertising & Marketing Manager

Brokers & Team Leaders…

“We are determined to prove that Service Floors will pay for your Tsplits™ account many times over, annually.

Service Floors can move you up-market, keep you top-of-mind and generate word-of-mouth, that least expensive and most effective form of advertising. It best enables you to differentiate, locally.

Let us prove it to you…!”

5. Service Floors

Tsplits™ syndication can apply upwards pressure on reward structures you and the brokerage or team. By establishing service floors and insisting on minimum amounts for real estate fees and term lengths you create value and a measure of exclusivity:

“A Mapsite listing is not for everybody. However, do you think YOUR listing is worth it? Don’t miss out…!”

In that same context, many of the best listings must be earned in ways that cannot easily be accomplished given common platform restrictions and standard differentiation techniques:

— Some prospects may want to be extra visible.

— Others may want to avoid identification at all cost.

How can you manage both utilizing just one approach that standardizes placement requirements? The solution is an industry adjacent advertising and marketing platform under your direction offering participation at one of five levels:

5. Market Partners

As Market Partner, you establish an unlimited number of “Root Mapsites” within your Tsplits™ territory.

6. Root Account Partners

As Root Account Partner you grow one “Root Mapsite” within one Tsplits™ territory.

1. Up line, “Root Mapsites” are map-based websites that operate under license from a Market Partner, or Tsplits™ directly.
2. Down line, they are maintained by Derivative Account Partners, who place PINs that inform (up to) four ways specific to each listing: URL1, URL2, TEB (Talis eBook) and TTV (Talis TV)[5]

Of course, we provide technology and other success-systems, and you charge under SPLITS terms[6], and per PIN[7].

[5] TTV will be available under Root Account terms, once Root Account Partners have reached a certain size and market penetration numbers.

[6] SPLITS means you have turned this portion of your advertising strategy from an expense into a revenue opportunity that only gets better with increased adoption: registered Agents, For-Sale-By-Owners and Adpros pay monthly base fees, plus weekly per PINs insertions in accordance with actual usage: no long term commitment: just let registrations lapse and the service stops.

[7] PIN means Place of Interest Node, essentially a listing.

7. Derivative Account Partners

As Derivative Account Partner you place and promote (up to) “X” number of PINs on “Root Mapsites” to which you have registered. Note: the up-line Root Account Partner decides upon the numeric value of “X”.

Benefits as Derivative Account Partner

If you are like most agents, your advertising budget is in the lower echelons of “non-existent” - you rely on brokerage and MLS® to get word out. Obviously, that is not the best strategy to ensure success for your real estate career. In that context:

1. Tsplits™ syndication is less expensive, than outside advertising, yet Mapsites can drive more traffic and over time more easily become online destinations for prospects, who seek one-click URL1, URL2, TEB and TTV contents and functionality.
2. Tsplits™ syndication distributes PINs to an ever increasing directory of Classifieds insertion sites that can contribute actionable buyer and seller leads NOT originating from industry platforms.
3. Tsplits™ syndication can make administrative positions revenue producing by inviting market proximity at more advantageous terms for FSBO, and at greater advertising flexibility for Referral Partners and Co-Promoters.

8. FSBO and Adpro Accounts

Single PIN Mapsites

1. Dedicated PINs that can act as a gateway to whatever one-click URL1, URL2, TEB and TTV contents and functionality reveals.[8]

[8] Contents must be non-political and in good taste by generally accepted standards at our sole discretion. We reserve the right to switch any PIN blind at any time without warning, or incurring any form of liability. Resubmissions or corrections are permissible, but must be initiated by the Account Partner.

9. A typical Account Adoption Process for Real Estate

The '**Core Business Analysis'** approach:

1. A Broker or Team Leader looks at all of the Brokerage or Team listings. Is there is at least one that might benefit from Tsplits™ value added strategies?

If yes…

2. Is it worth the expense of a TSPLITS account: Brokerage / Team annual: $1,000.00; Brokerage / Team monthly: $100.00; Agent annual: $200; Agent monthly: 100.00; each Listing PIN is $7 weekly (a dollar per day).
3. How many agents are there in the brokerage?
4. How many want to participate - and - is the broker / team leader in favour of all participating, or should this be a merit based initiative?
5. How many PINs will they each place; is a volume-based SPLITS renegotiation required?

6. Can expenses be mitigated by…
    a. Higher fees and/or longer listing terms? - Of course; the “Service Floor” policy basically guarantees that.
    b. Number of listings won? - Probably; no competitor will have an industry adjacent Mapsite with exposure syndication.
    c. Transactions closed? - Probably; more immersive presentations often lead to better sales, quicker.
    d. More and longer term renewal rates? - Of course; no competitor will have an industry adjacent Mapsite with more immersive presentations.

10.Value Added Tools

In order of application:

1. **Mapsite:** available immediately. It is generated the moment you build your first eBook, or personalize the one was built for you. That process generates the Mapsite and a temporary FAST Code (Free Allocation - Standard Tracking), which you activate by registering your Tsplits™ account.
2. **Talis eBook (TEB):** We provide three eBook templates: MS Word, Apple Pages and Google Docs: simply replace placeholder images and publish to PDF to generate brochures, project outlines and other forms of fact sheets.
3. **Talis Value Added (TVA):** What Webster and his team does: analyze listings to establish if, in their opinion, they see a project. If you would like to pursue it further on your client’s behalf - GREAT, this is the beginning of a fulfilment process. If NOT, you will never hear another word about it.
4. **Talis Television (TTV):** Optional; we act as your production team, turning your photos, audio and video footage into virtual open houses, virtual walk-throughs and infomercials, with or without hosts or co-hosts.
5. **Geographic, Demographic and Psychographic Marketing Options**
    a. Geographic: you are licensed wherever you are licensed, but you vacation in [fill in the blank], or plan to move to [fill in the blank]. You already know the market and have a surrogate with whom you might work there. So - why not locate a “Root Mapsite” there?
    b. Demographic: you live wherever you live, and your office is located wherever it is located, but you know about the [fill in the blank] industry

and that market is somewhere else. locally. So - why not place your home pin central to that area and become more visible to that sort of clientele?

c. Psychographic: you succeed at real estate, but in your heart you are [fill in the blank], and you have the most fun working with prospects who share that passion. So - why not place your home pin to become more visible to that sort of clientele?

11.Frequently Asked Questions

1. **Do Mapsites replace MLS®, or traditional listing sites?** No. However, they can work alongside them to reach people otherwise often missed.
2. **Is Tsplits™ a real estate brokerage?** No. It is an advertising, marketing and project development entity. Your real estate transactions are handled by professionals you choose.
3. **Do you charge Referral Fees?** No. We charge to maintain accounts and provide services.
4. **Is there a long-term commitment?** No. Simply let accounts or entries lapse and there is not further obligation.

12.Legend

- **Mapsite:** a map-based real estate industry adjacent marketing platform provided by TSPLITS Inc. of Nova Scotia, Canada.
- **PIN:** Place Of Interest Node: a marker on a map that opens an image, write-up and links when clicked.
- **TEB:** Talis eBook, page-turning eBooks made from your PDFs. ‘Centrefold’ and ‘Facing Pages’ generic samples provided in MS Word, Apple Pages and Google Docs originals.
- **TVA:** Talis Value Added, listing analysis and review of possible alternate deal structures or investor classes to suit an object, project or opportunity (if any).
- **TTV:** TalisTV, audio and video production and online broadcasting. This is an optional extra that will be made available in late 2026, or early 2027.
- **MLS®:** Multiple Listing Service and MLS® are trademark owned by The Canadian Real Estate Association (CREA) and identify the quality of services provided by real estate professionals who are members of CREA.
